Blink.new growth tools

Growth Intern, Blink.new · Jan 2026 to Oct 2026

PROBLEM

Blink.new needed repeatable growth channels, and the team had no tooling for creator outreach, link building, AI-search visibility or Reddit.

DECISIONS

I built four internal tools as the sole developer. The outreach pipeline (Python, SQLite, YouTube Data API, Gmail API) uses an LLM to draft messages, but a human approves every send. The link-building engine is a Flask dashboard that finds and scores prospect sites and extracts contacts.

RESULT

650 leads sourced, 489 emails sent, 41 of 228 contacted creators replied (18%), 14 positive. The link engine scored 676 prospect sites, AI-search tracking covered 18 prompts, and Reddit was 29.85% of Blink social traffic in Jun 2026.

4 internal growth tools 650 leads sourced 489 emails sent 18% of contacted creators replied (41 of 228)
14 positive responses 676 prospect sites found and scored 29.85% of Blink social traffic from Reddit (Jun 2026)

Python · SQLite · Flask · YouTube Data API · Gmail API
