CASE FILE

Blackout

Turns an OLED phone screen fully black while audio keeps playing.

PROBLEM

On an OLED phone, listening to audio keeps the screen lit and drains battery.

DECISIONS

Blackout turns the screen fully black while audio keeps playing. Fingerprint unlock and a Quick Settings tile control it, and it uncovers by itself for calls and alarms. It requests no internet permission.

RESULT

A Kotlin Android app; source at https://github.com/dhruv4740/blackout.

Kotlin · Android
